

FITTING INSTRUCTIONS - UPRATED REAR UJ HUB

- Please refer to a good workshop manual when carrying out this task.
- You will find all the information you need in the official Triumph manual or a Haynes manual.
- The hub is supplied ready to fit with no setting or adjustment for the customer to do.
- Two things in addition:
 1. Examine the security of the 6 studs on each trailing arm; they are known to be a weak point.
 2. The tightening torque for these studs is 18 lbs ft.
